Notebook 1 - SQL Exploration

1. Total number of customers

06:31 PM (<1s) 3: Total number of customers

```
select COUNT(Customer_ID) AS Total_Customers
from workspace.dataforge_work.insurance_data
```

See performance (1) Optimize

Table +

	Total_Customers
1	550

1 row | 0.09s runtime Refreshed 2 hours ago

2. Total number of policies

06:31 PM (<1s) 4: Total number of policies

```
select COUNT(Policy_ID) AS Total_Policies
from workspace.dataforge_work.insurance_data
```

See performance (1) Optimize

Table +

	Total_Policies
1	550

1 row | 0.29s runtime Refreshed 2 hours ago

3. Total number of claims

06:31 PM (<1s) 5: Total number of claims

```
select COUNT(Claim_ID) AS Total_Claims
from workspace.dataforge_work.insurance_data
```

See performance (1) Optimize

Table +

	Total_Claims
1	547

1 row | 0.16s runtime Refreshed 2 hours ago

4. Total claim amount

06:31 PM (<1s) 6: Total claim amount

```
select SUM(TRY_CAST(TRANSLATE(Claim_Amount, 'R,', '') AS DOUBLE)) AS Total_Claim_Amount
from workspace.dataforge_work.insurance_data
```

See performance (1) Optimize

Table +

	Total_Claim_Amount
1	12,338,859.64

1 row | 0.30s runtime Refreshed 2 hours ago

5. Claims by policy type

06:31 PM (<1s) 7: Claims by policy type

```
select Claim_ID, Policy_Type
from workspace.dataforge_work.insurance_data
```

See performance (1) Optimize

Table

	Claim_ID	Policy_Type
1	CLM9000	Home
2	CLM9001	Auto
3	CLM9002	Health
4	CLM9003	Auto
5	CLM9004	Home
6	CLM9005	Home
7	CLM9006	Motor
8	CLM9007	Life
9	CLM9008	Home
10	CLM9009	Funeral
11	CLM9010	Motor
12	CLM9011	Auto
13	CLM9012	Home
14	CLM9013	Life
15	CLM9014	Auto

550 rows | 0.25s runtime Refreshed 2 hours ago

6. Average claim amount per policy type

06:31 PM (<1s) 8: Average claim amount per policy type

```
select AVG(TRY_CAST(TRANSLATE(Claim_Amount, 'R,', '') AS DOUBLE)) AS Average_Claim_Amount
from workspace.dataforge_work.insurance_data
```

See performance (1) Optimize

Table

	1.2 Average_Claim_Amount
1	22,849.74

1 row | 0.33s runtime Refreshed 3 hours ago

7. Number of fraud vs non-fraud claims

06:31 PM (<1s)

9: Number of fraud vs non-fraud claims

```
select CASE WHEN Fraud_Flag = 'Yes' THEN 'Fraud' ELSE 'Non-Fraud' END AS Fraud_Type, COUNT(*) AS Claim_Count
from workspace.dataforge_work.insurance_data
group by CASE WHEN Fraud_Flag = 'Yes' THEN 'Fraud' ELSE 'Non-Fraud' END
```

See performance (1)

Optimize

Table

	Fraud_Type	Claim_Count
1	Non-Fraud	477
2	Fraud	73

2 rows | 0.18s runtime

Refreshed 3 hours ago

8. Top 5 highest claim amounts

06:31 PM (<1s)

10: Top 5 highest claim amounts

```
select SUM(TRY_CAST(TRANSLATE(Claim_Amount, 'R,', '') AS DOUBLE)) AS Total_Claim_Amount, Policy_Type
from workspace.dataforge_work.insurance_data
group by Policy_Type
```

See performance (1)

Optimize

Table

	Total_Claim_Amount	Policy_Type
1	2,132,902.89	Home
2	2,141,430.59	Auto
3	1,511,396.12	Health
4	149,291.77	Motor
